Bdo fishing guide ps4

Korean studio Pearl Abyss's huge online multiplayer Black Desert Online has seen great success over the years. Now released on Xbox One, the game has captured a new audience. With that in mind, the new players are flocking to this wonderful title every day. For all of you new players, we have some advice. If you want to find success in Black Desert Online, you're going to want to fish. Fishing is one of the best ways to get the currency of Black Desert Online. Consequently, players have honed to act under the science since the game's release. If you want to be caught in the sea, see the tips below. Get Your Hands on Artisan Fishing RodsThere Are Different Fishing Rods. The first you get is called the Old Fishing Rod. This point is not useful much outside of teaching you the basics of fishing. If you want to get serious about your angling, then you're going to want to upgrade. The top quality fishing rod you are going to want to grab one of the three pets. Marmot, polar bear and penguin pet each give a useful fishing bonus. According to their level, they reduce their car during fishing anywhere from between 10-20%. Polar bears and penguins are sometimes offered as benefits of the event, while marmots are ordinary pets in the pearl shop. Acquiring some fishing clothes Silver embroidered fisher clothes increases your fishing rank, fishing experience and speed of movement. Consequently, you're going to want to nab the couple as soon as possible. You can craft one costume mill. There are also fishing outfits that offer marginal benefits. Having a fishing outfit isn't really much needed, but can give you a nice boost to your swimming speed and swimming endurance. Find a place for fish to maximize your fishing efficiency, you are going to have to find the main fishing spot. A detailed map of the game's sea areas and fishing tables can be found [somethinglovely.net](#). The fishing table shows which fish you can catch in this area of the sea. Sometimes the region's once abundant resources can become overused by other anglers, so make sure to bounce around places when fishing. Know how to sell your fish Value fish you catch will deteriorate over time. Within 24 hours, the fish will become worthless. But there's a catch. You can sell a blue and gold layer of fish to imperial fishing operators at 250% of their full price if the fish is at least 23 hours and 59 minutes fresh. You can find these traders in Vella, Glish, Epheria Port, Splashing Point and Valencia You have collected your necessary equipment and made your way to a prominent fishing spot, you are ready to start angling. To make the car fish, just press the casting button (spacebar on the PC) and watch the fish pile up. Active fishing is faster, but also more tedious. Consequently, many players use their pet, rod and clothing bonuses to reduce their car fishing times and then let the game do the job for them. Fishing is one of the easiest life skills to get into, because all you really need is a fishing rod to start with. Fishing can take place actively or afk and many players decide afk fish bottom character overnight for additional profit. Fish don't stack your list though so having a lot of inventory space is important to your fishing nature. Different catch levels are: Beginner Level 1 – 10 Apprentice Level 1 – 10 Qualified Level 1 – 10 Professional Level 1 – 10 Artisan Level 1 – 10 Master Level 1 – 30 Guru Level 1 + Fishing level can be obtained by catching fish and gained. experience. The greater the rarity of fish, the more experience it gives. A good source of EXP is also filling fishing quests around the game. Although these quests can be quite annoying and not recommended. The higher the level of fishing benefits: the higher the fishing skill, the faster and more likely you are to catch higher quality fish (classes: white, green, blue, yellow, orange) You have the ability to use better rods. You open up certain fishing quests. You can see more fishing hotspots through the ocean. Allows the setting of discards to be used. Fishing rods are equipped with your main arm's socket. There are many different fishing rods you can use. Some fishing rods can increase Black Stone (Weapon) extra stats and/or durability. Check out our falstack guide to see how many falstacks you should use them. For afk fishing you want to have a +10 Balenos Fishing Rod. This is because balenos fishing rod can increase and provide greater durability and also increase the speed that you AFK fish. The Balenos fishing rod can also be repaired, unlike many other fishing rods. Every time you cast your fishing rod, you have a chance to lose the endurance item. If the durability reaches zero or you run out of stock space then stop fishing. You can use Item Brand Spell Stone (Pearl Store > Misc. > 400 Pearls) on a fishing rod to reduce endurance consumption, allowing you to fish longer before your rod breaks, but this is recommended only if you have enough stock slots and do not complete your inventory overnight. For active fishing you should use Triple Float Rod (if available), or Mediah Rod freshwater fishing and Calpheon Rod saltwater fishing. You can also use item brand spelling stone (Pearl Store > feature > Misc. > 400 Pearls) to reduce endurance consumption. Below is the full breakdown of all fishing floats: Item Name Data How to Get Maple Flots(Requires Fishing Artisan 1) Durability: 50Chance to Catch Rare Fish +1% to +5%(Depending on Accessories)Can Improve Tool Workshop (Level 2) Maple Material x1Oil Peace x3Red Crystal x2Pure Lead Crystal x2 Ash Tree Float(Float Requires Fishing Professional 1) Durability: 50Chance to catch Big Fish +1% to +11%(depending on enhancements)Can be improvedCan improved Tool Workshop (Level 2)Ash Timber x1Oil peace x3Translucent Crystal x2Pure Lead Crystal x2 You can also use Crio's Fishing Chair, which goes to your offhand slot. Crio fishing chair can be crafted at carpenter's level 3 each Material: Standardized Timber Square x15, Ash Plywood x15, Steel x5, Monk's Branch x5, Trace of Origin x20, Plywood Hardener x5 You can also exchange Fish Bones and tattered Boots crio's Fishing chair at Vella to become Crio's Fishing Chair. Crio's Fishing Chair has a base resistance of 100, and consumes 1 resistance per fishing test. Crio's Fishing Chair can equip character and gives Fishing Mastery +100. Players found that it's usually better to use MapleFloat instead of Gear/Bufs To maximize the quality and quantity of caught you need to have either a high catch level and/or maximum fishing capacity level. To achieve level 5 fishing ability you can use a combination of the following buffs: Fishing Jewelry (+1) Guild Buff (+1-+3) Silver Embroidery Fisher's Jewelry (+1-+2) Balenos Flour (+2) Fisher's Elxir (+2) Al Chemy Stone / Life Spirit Stone (+2) Pet Skills (+1 per pet) Tailor pong (+1) Ideally though you want to try and maintain fishing capability level 5 without popping food/elixirs/alchemy stone so you have a level 5 buff AFK fishing as well. If you have a fishing rod, approach any water source with your fishing rod equipped, then press [SPACE] to cast your line. Then starts fishing and must now wait until you have a bite. There are different fish stocks depending on where you fish and how many people have fished in the area. The less resources there are, the longer it takes to bite, so ideally you want abundant resources, but it's not too important that you have to worry about it. Below are the stocks listed at the highest lowest: The rich average is not sufficiently exhausted if you have a bite, you are shown fishing cut bubble above your head. You have to press [SPACE] to start a mini-game. Then a bar appears that fills and clears a maximum of 3 times when it fails automatically. If the bar is in a blue area, you must press [SPACE] again. If you succeed then you will reach the last stage of the minigame. If you fail, you're going to have to pour your line again and wait for another bite. You can get the perfect reel if you manage to press the spacebar at exactly the same time that the bar is completely full. On the perfect reel, you can skip the last part of the minigame and get your fish instantly. The second and final stage of the minigame is when you just have to press the right buttons over time. The longer the jad, the better the fish you are rolling! Once you have successfully completed all the stages of the minigame you will get a window into the fish you have just caught. Press [R] to pick up the fish and put it on your list. If you rephras the line without pressing [R] then the fish will be deleted. If you go cast your line, you can also hold [SPACEBAR] and invest energy in your cast. A maximum of 10 energy points can be a roll option to catch several fish. If you combine it with With Triple-Float Fishing Rod you have the chance to get 5 fish in one cast! To create AFK fishing, all you have to do is cast your line. When you get a bite, your character waits 3 minutes (base time) so you can manually catch the fish. If you don't catch fish then the game will automatically catch it for you and it will go straight to your list. Be sure to check afk settings and location before going to AFK. You can tick the box shown in the Fishing UI to make sure you can rob other players on the boat. You should also make sure that the AFK security zone if you are going to AFK for a long time, because some players may decide to kill or take you on an adventure with them. You can also choose the grade of fish you want to throw away. For example, if you select a green fish icon, you will throw away white, green, blue and yellow. You still keep the trash regardless, but the trash is its own exploits (check out the fishing loot section below for more info). Certain Fishing Life skill levels are required to use the discard device: White Fish icon: Professional 1 + Green Fish icon: Professional 1 + Blue Fish icon: Artisan 1 + Yellow Fish icon: Master 1 + After double checking your location and throw settings, the last thing to do is close the game tray (it does not exit the game completely). This is when the game works as a background process, but does not load the graphics card. This is useful if you want your electricity bills to be controlled. To do this, press [ESC] > Disconnect > Minimize to tray. Fish rarity is consistent with the rarity types of Black Desert Online. White fish – about 2k Silver Green Fish – about 2k Silver Blue Fish – about 5k Silver Yellow Fish – about 20k Iver Orange Fish – about 125k Silver If you catch the fish, you have a 24-hour expiration date for them. The longer you leave them out the lower price you get until you reach 0% and can no longer sell. The fish is sold to every commercial manager. Blue and yellow fish can also be sold at Imperial Fishing Delivery NPC but the NPC accepts only a certain amount of fish. You can find the nearest Imperial NPC by clicking on the magnifying glass in the upper corner next to the minicard and searching the search box for Fishing. For maximum profit you ideally want to sell your fish to a Trade Manager that is the furthest from the origin of your fish. Each node between the origin of the fish has – 3% price increase. This also does not apply to fish sold through Imperial Delivery though. Note: You don't need link nodes to sell your fish at the maximum price. Trading in Valencia with an Artisan 2 Trading buff is viable and can significantly increase your profits, but can be more time consuming. You can also dry fish before they expire and it will preserve them, but you will no longer be able to sell them to the trader. Instead are now sold on the central market, but they may not be worth much depending on the type and demand of the fish. Dried fish is used in cooking recipes. You can catch other items during fishing: Ancient Relic Crystal Shard Breezy Conch Seaweed Silver Key Bottle with Note – see our guide more info about Tower Net - trash item, swap x5 fishing EXP Fish Bones - trash item, swap x5 Crio's Fishing Chair Snapped Rope Trash - Trash Item, Exchange x5 3k Silver Tattered Boots - Trash Item, Exchange x5 Crio's Fertilizer Chair Fishing - Trash Item - swap x5 bet EXP Broken Bottle Fragment - trash item, exchange x5 for Breezy Conch Seaweed Higher fishing mastery has the following advantages: A greater chance of catching newly added Orange class fish (Legendary fish) – worth 1 million to 100 million silver. A greater chance of catching Legendary Fish than Harpoon fishing - worth 50 million to 100 million silver. The greater chance of getting an Ancient Relic Crystal Shards Investing Mastery gear is not really worth it if you don't want harpoon fish or actively fish. However, you can still use your aces for other Life Skill Mastery for the bonus. Legendary fish can be fished in specific locations in both freshwater and sea. They can be sold to traders at high prices, but Imperial Fishing is not available. Boats are important because most hotspots are in the middle of the sea and move every 30 minutes. To get a boat you can either buy it out of the central market or craft it yourself. For more information about the ships, see our ships guide. Hotspots have specific spawn locations, but are completely random and only last 30 minutes before moving to another random spot. They don't spawn ross sea, Margoria Seas, Root Sea or Vadabin Sea. Hotspots are marked by school fish jumping out of the water with the seagulls surrounding it. If you are fishing inland on a river or lake you only see school fish jumping out of the water. Hotspots only give you one type of yellow fish. For example, you can find a Grunt hotspot where you can only catch grunt fish. Thanks to this, hotspots can be very profitable. There are also special Coelacanth hotspots. Coelacanth is an orange fish that is worth 125,000 silver. Unlike other hotspots, these Coelacanth hotspots disappear after the first fish is caught. They spawn near the ports of Vella, Epheria and Arehaza, as well as a few spawns. There is also an option that can catch multiple fish in a single cast standard fishing rod. If you hold [SPACEBAR] and invest energy in your cast. A maximum of 10 energy points can be a roll option to catch several fish. When combined with this method Triple-Float Fishing Rod you have the option of getting 5 fish in one cast! The most popular areas for AFK fish are: Vella Hotspot - [CLICK LOCATION] Safe Zone Provides a good amount of yellow fish Frequent, but lower value prizefish Low drop rate Ancient Relic Crystal Shards Always exhausted resources tooth Fairy Cabin - [CLICK LOCATION] Safe Zone High drop rate of Ancient Relic Crystal Shards 2 possible prizefish low drop rate Grana is close to selling your fish through Imperial Delivery Good distance valencia if you want to sell your fish there Artisan Trading buff Great if you have an Archaeological Map or you can use Guild Command to collect The Banto Sea Best Spot Fishing EXP Low money making Harpoon weapons can only be done as a tool workshop on Ilya Island (Ilya Island 4-1) and are necessary for Harpoon Fishing. They cannot be repaired or improved. You also need a fishing boat or (harpoons must not be used on Epheria vessels). There are two types of Harpoons: Thin Harpoon Durability: 30 Handmade Materials: Cedar Wood x1, Copper Got x4, Black Stone Powder x1 Level Required: Professional Lv 1 Thick Harpoon Durability: 40 Craft Materials: Cedar Wood x2, Iron Got x7, Black Stone Powder x3 Level Required: Professionals Lv 1 minigame for harpoon takes more time and is more complex than fishing rod. The goal of the game is to shoot a fish that swims around by moving the mouse to aim and pressing [SPACE]. You only have a certain amount of harps and time to hit the fish and bring it to health zero to catch it. To earn a profit from harpooning you really need at least 700 Fishing Mastery points. Harpooning revenue depends entirely on being able to catch prize fish and therefore it can be quite controversial. The best place to go is the Central Margoria Sea (you can find where it is by checking out our map and adding Sea Regions as an extra layer).
